EXPERIENCE

Senior Software Engineer at Hughes Systique Corporation

Aug 2022 – present

- Developed and implemented highly responsive user interface components using ReactJS, Redux, and Typescript. I've built reusable components that are used throughout the entire application. Additionally, I have conducted research and development for new product requirements at the enterprise level.
- My experience includes web application development for a variety of devices, including smartphones, smart TVs, tablets, and more. I also have a track record of translating and implementing designs and style guides provided by the UI/UX team effectively.
- I am proud to have contributed to the development of the BlueJeans product, which is currently in use by millions of users worldwide. Throughout this journey, I have followed Agile methodologies and used tools such as JIRA for project management, Git for source control, and Jenkins for CI/CD pipelines.

Software Engineer at IQgateway

Jan 2021 – Aug 2022

- I have a strong background in designing UI with technologies such as React JS, Redux, Material UI, and Mobx. In my role as a Front-end lead, I am responsible for reviewing the code of junior developers, ensuring the quality and adherence to best practices.
- My professional focus has been on US healthcare products, where I have successfully applied Agile methodologies, utilizing tools like JIRA for effective project management, and Git for source control. Additionally, I have streamlined our development process by implementing Jenkins for CI/CD pipelines.

Junior Software Engineer at DesignTech Systems

Jan 2020 – Dec 2020

- Designing UI with React JS, redux material UI. Restful Api's in Django framework, Created features, workflows & Resolved bugs for frontend of Threat Exchange System with ReactJS.

PROJECTS

BlueJeans by Verizon

- BlueJeans is an Enterprise level CMS of a Video Conference Application over 3M users worldwide. In Bluejeans every user has a private Meeting Room in the BlueJeans cloud to schedule and host conference meetings (React, Redux, Typescript, Webpack).

DYD (Discover Your Data)

- This project focuses on the request and submission of healthcare data, encompassing data quality checks, data exploration, access to insights and reports, anomaly detection, and the investigation of potential fraud cases (React, Redux, MUI, Typescript).

Tgraha

- Tgraha is I2H health care product for health care logistic company and health care Ecommerce companies, hospitals and diagnostics centers. This product includes in house phlebotomy, order status, order Tracking, sample collection and delivery.(React, Redux, Ant-d, Javascript).

TECHNICAL SKILLS

Core-Skills

Data Structures & Algorithms, FullStack Development, Object Oriented Programming

Tools

Git, Github, Bitbucket, JIRA, Postman, Linux

Web-Development

HTML, CSS, Bootstrap, JavaScript, TypeScript, REST API, ReactJS, Redux,vue js, React Native, Ant Design, MUI

Databases

MySQL, MongoDB

ACHIEVEMENTS

- 1000+ Problems solved on various Coding platforms like LeetCode, HackerRank, PepCoding etc.
- Received Great Appreciation from client for UI of Web Application
- Appreciated from Principal Engineer for showing Customer Obsessions and Disagree & Commit Leadership Principles.

EDUCATION

B.Tech

- JNTU-Kakinada, Andhra Pradesh

May 2014 – May 2018

CGPA 8/10.0

LICENSES AND CERTIFICATIONS

- Upgrad verified JavaScript certificate
- Upgrad verified Reactjs certificate
- React.js Essential Training – LinkedIn
- Django – LinkedIn
- Building RESTful Web APIs with Django – LinkedIn
